David Thompson - Gouge Quality Cleaners

Albury, NSW 5th Jan 06 David's machine was delivered a little earlier than expected, in fact just before the Christmas holidays. He, with the help of his local electrician and plumber, installed the machine without incident. Robert Stevens, the Victorian distributor for Union, commissioned it for him.

Initial impressions

He ran two mixed loads and was over the moon with the results. His wife loved it. His presser loved it.

Follow up impressions

"It's fantastic. Best thing I've ever done."

David was a bit concerned, like many others about the GreenEarth solution. He had read the industry literature and was worried about needing to do more spot removal. Now he confirms there is "no more spotting if not less". If the red wine doesn't come out in cleaning, he just spots it out afterwards. There is no pre-spotting at all. The other day he saved 3 loads of lights and even though the loads are longer "it's so much quicker".

David said that he'd be surprised if in the next 5 years, once drycleaners see it and use it that most would switch. "It's unbelievable! I've never seen anything like it."

About GreenEarth

GreenEarth® Cleaning Australasia is designed to differentiate your business from the general dry cleaning industry and to provide a process and products that are "good for everybody".
